خلاصه مقاله:

Guiding urban space changes over time and is not possible to provide a temporal design considering the organizations. The main purpose of this research is to examine the quality criteria in the design of urban spaces and to introduce an identity for the creation of quality places that lead to sustainability using different methods. The case study is the historic Chahar Bagh Street in Isfahan. Significant buildings and landmark activities such as the bazaar, the Chahar Bagh School, the cinemas and commercial passages reinforce the dynamics of the urban space and the existing scape. The proposed projects are prioritized as follows: creation of hangout and meeting space, renovation and flooring of sidewalks, body painting, modification, painting and use of folk art

کلمات کلیدی:

Townscape, Identity, Chahar Bagh Street, Isfahan, Traditional Architecture, Space design
