

## عنوان مقاله:

The 2010 Canterbury Earthquake

## محل انتشار:

ششمین کنفرانس بین المللی زلزله شناسی و مهندسی زلزله (سال: 1390)

تعداد صفحات اصل مقاله: 8

## نویسنده:

G. A. MacRae - *Department of Civil and Natural Resources Engineering, University of Canterbury, Christchurch, New Zealand*

## خلاصه مقاله:

After decades of building the city of Christchurch New Zealand, and the surrounding regions, about \$4 billion damage occurred in just a few seconds but with few full collapses and with no loss of life. This paper describes the type of damage sustained, examines the difference between the damage observed and that expected, and discusses some of the activities conducted after the earthquake.

## کلمات کلیدی:

Earthquake Reconnaissance, Preliminary Observations
