

## عنوان مقاله:

Decarboxylative cyanation and azidation of carboxylic acids: An overview

## محل انتشار:

مقالات مروری و پژوهشی شیمی، دوره 3، شماره 1 (سال: 1399)

تعداد صفحات اصل مقاله: 7

## خلاصه مقاله:

The present review gives an overview over the synthesis of organic nitriles and azides through the decarboxylative cyanation and azidation of carboxylic acids, respectively. Mechanistic features of the reactions are considered and discussed in detail.

## کلمات کلیدی:

Decarboxylative functionalization, carboxylic acids, organic nitriles, organic azides, single electron transfer
