تعداد صفحات اصل مقاله: 8

**نویسنده:**

MALIHE PEYVASTE

**خلاصه مقاله:**

In this paper, first we introduce the concept of anti-

character amenability of Banach algebras and prove that for a Banach algebra  $A$ , anti-character amenability is equivalent to the character amenability. By this work, we achieve a new characterization of character amenability of Banach algebras. Afterwards we define the concept of 3-Jordan amenability and study the functorial properties of that, and show that the 3-Jordan amenability is equivalent to the character amenability of the Banach algebra  $A$ .
