## خلاصه مقاله:

Today, bleach and detergents are the most commonly used products in the Society. People may use a mixture of detergent and bleach to achieve extra cleaning, a combination which, due to chemical reactions, releases large amounts of chlorine, resulting in poisoning symptoms when Inhaled. Case presentation: In this case report, we discuss a maternal death of a hemophilic pregnant woman after using a combination of bleach and detergents, in her early stage of Pregnancy. Key Clinical Message: Use of detergents and cleaning products puts women at risk due to hazardous chemical substances. Education of all women, especially pregnant and high-risk women about the proper use of detergents, is a Necessity.

## کلمات کلیدی:

bleach, detergents, poisoning, maternal mortality
