خلاصه مقاله:

A standard is "a specialized record outlined to be utilized as a run the show, rule or definition". Guidelines are made by bringing together all interested parties such as producers, customers and controllers of a specific fabric, item, handle or benefit. Documentation audit appears that the awe of Extend Administration (PM) standard has been expanded this implies that organizations are attempting to utilize a coherent and standard structure to attain their objectives. In spite of the accessibility of different benchmarks within the field of venture administration, the determination and application of each of these measures are done agreeing to the two components of the extend sort and the skill and encounter of the venture group. Extend benchmarks are the rules and traditions governing the way in which a venture will be conducted. This direct will assist you recognize the standards for your venture with an eye to setting guidelines that are reusable for future ventures. The most reason of this ponder is to investigate the differences and similarities between three of the most widespread and adopted standards and best practices in the world: ISO ۲۱۵۰۰, ISO ۲۹۱۱۰, the PMBOK Guide and PRINCE۲. Our purpose is to use each of these standards to get the maximum benefit not to choose any of the above three standards.

کلمات کلیدی:
