عنوان مقاله:

Normal Solution of the LP problem by Modified Lagrangian Function and Armijo rule

محل انتشار:

اولین کنفرانس بین المللی تحقیق در عملیات ایران (سال: 1386)

تعداد صفحات اصل مقاله: 2

خلاصه مقاله:

In this paper we have proposed to use augmented Lagrangian methods for solving primal LP problem. The auxiliary : unconstrained minimization problems are solved by fast generalized Newton method and we investigated its finite global convergence with the Armijo step-size regulation

کلمات کلیدی:

Linear programming, Lagrangian methods, piecewise quadratic programs, normal solution, generalized Newton method, Armijo rule, penalty parameter
