خلاصه مقاله:

Evidence shows that deadly pandemics have been happening more often in recent decades^{۱, ۲}. As shown in Figure^{۱, ۵} out of ۱۲ deadly pandemics occurred in the ۲۰th century and the other ۲ in the ۲۱st century. The last four pandemics occurred almost every ۱۵ years on average. It seems that the occurrence of pandemics getting more frequent over time. It warns us that deadly pandemics are likely to keep happening, spread faster, and kill more people than Coronavirus Disease ۲۰۱۹ (COVID-۱۹) soon if we do not take appropriate preemptive global action to protect natural environments. Such pandemics can be a dangerous threat to the world economy and long-lasting harm to social and cultural life.
