خلاصه مقاله:

Breast cancer is the third most common cancer in the world and the most common cancer in women. Early detection of the disease helps to control and successfully treat it. Although mammography is the gold standard for screening for breast cancer, most people refuse to do it. For this reason, this article aims to identify some of the barriers to breast cancer mammography screening in women. This article is a review of a regular internet search of reputable databases between ۲۰۱۲ and ۲۰۲۲ and library resources with the keywords screening, mammography, breast cancer and barriers.

کلمات کلیدی:

Screening, mammography, breast cancer, barriers
