## خلاصه مقاله:

Breast cancer is the most common cancer among women. Cancer patients face a variety of challenges from the time they are diagnosed until the day they are alive, one of the most important of which is psychological issues. In the present study, the issues related to the mental health of cancer patients are investigated. Methods: The present study is a summary review designed in 2022. The keywords Breast Neoplasms and Mental Health were researched in the Scholar, Scopus, PubMed, and ISI databases for the period 2019 to 2022. 49 articles were found and after reviewing, 31 articles were used for writing.

## کلمات کلیدی:

Breast Neoplasms, Mental Health
