خلاصه مقاله:

Breast cancer is the most common cancer in women and although the causes of breast cancer are not completely understood, exposure to human papillomavirus (HPV) is considered a risk factor for breast cancer. In the present study, we investigated the relationship between (HPV) and breast cancer. The present study is a summary review designed in ۲۰۲۲. The keywords Breast Neoplasms and HPV were searched in Google Scholar, ISC, Scopus, PubMed, and ISI databases for the period ۲۰۱۸ to ۲۰۲۱. ۶۷ articles were found and after reviewing, ۴۵ articles were used to write the article.

کلمات کلیدی:

(Breast Neoplasms, human papillomavirus (HPV)
