خلاصه مقاله:

The issue of distributivity of aggregation operators is crucial for many different areas such as the utility theory and the integral theory. The topic of this paper is distributivity between Ψ -uninorms and Mayor's aggregation operators. The presented research is an extension and upgrade of the previously obtained results. The full characterization of distributive pairs of operators is given

کلمات کلیدی:

GM aggregation operators, uninorms, t-norms, t-conorms, Ψ -uninorms, distributivity equations
