خلاصه مقاله:

We consider the coupled system $F(x,y)=G(x,y)=0$, where $F(x, y)=\sum_{k=0}^{\infty} \sum_{l=0}^{m_1} A_k(y)x^{m_1-l-k}$ and $G(x, y)=\sum_{k=0}^{\infty} \sum_{l=0}^{m_2} B_k(y)x^{m_2-l-k}$ with entire functions $A_k(y), B_k(y)$. We derive a priory estimate for the sums of the roots of the considered system and for the counting function of roots

کلمات کلیدی:

coupled systems, entire and polynomial functions, a priory estimates, resultant
