## خلاصه مقاله:

new season has emerged in human life, during which the achievements in all political, economic, military domains are achieved, neither with past factors nor with today's advanced military weapons, but with the power of propaganda. In this regard, the author intends to examine the course of "extreme manipulation of the mind" as an example of political propaganda in the world with a descriptive-analytical viewpoint, while pointing to the concept of political advertising and separating it from other types of advertising. Since "political propaganda" has been considered as a science, evidence suggests that it has its own hypotheses, principles, and laws. As a result, the person or media that can do it better in the pursuit of its goals, is ahead of everyone. Influencing attitudes requires a special talent to clearly understand what the audience needs, what they are thinking about, and how they are reacting
