## خلاصه مقاله:

The purpose of this article is to examine the relationship between businesses in the age of technology and the necessity of entrepreneurship considering future conditions. While we are witnessing new achievements in various fields every day, the need to deal with employment in the future world is also increasing every day. The importance of examining the difference of jobs in the future is because if there is not enough knowledge about them, all people will have problems in employment. Applying previous teachings and getting new information about this can solve this problem to some extent. Considering the upcoming changes, entrepreneurship in the future world should also happen under the shadow of business developments. Entrepreneurship in the developing world should be done taking into account the knowledge of the day, and the variety of jobs will definitely expand to such an extent that it can create many opportunities for innovative and creative people to create their own business.

## کلمات کلیدی:

Entrepreneurship, technological progress, business, economy, global developments
