خلاصه مقاله:

Individual differences are one of the most fundamental facts of human life. Knowing the differences, wisdom and their results is very important in building the human worldview and his social interactions. On the other hand, answering the questions and resolving the ambiguities surrounding an important issue such as divine justice depends on knowing the wisdom and results of individual differences. By differentiating between wisdom (philosophy of existence) and result (result of presence) of individual differences, this research examines verses and narrations related to the subject. The research method is descriptive-analytical in such a way that after collecting verses and narrations with library search tools, it analyzes their content. The results of the research show that: divine will, knowledge of God, employment of people, consistency of human life, creation of different positions and different duties, mutual recognition, divine test and display of divine justice are among the most important wisdoms of individual differences in the verses and traditions. Also, the most important results and consequences of these differences are: difference in responsibilities, not judging each other, consulting, avoiding fault-finding and blaming others, pardoning and accepting .excuses, and respecting capacity for duty

کلمات کلیدی:

individual differences, Differences in duty, Knowing each other, Divine Justice, Divine Test
