خلاصه مقاله:

The faunistic study of the family Phoridae carried out in northwestern of Iran during ۲۰۱۳-۲۰۱۷. Five species (Conicera tibialis Schmitz, ۱۹۲۵, Dohrniphora cornuta (Bigot, ۱۸۵۷), Gymnophora arcuata (Meigen, ۱۸۳۰), Metopina oligoneura (Mik, ۱۸۶۷) and Triphleba intermedia (Malloch, ۱۹۰۸)) are newly recorded from Iran. The genera Conicera Meigen, ۱۸۳۰, Dohrniphora Dahl, ۱۸۹۸, Gymnophora Macquart, ۱۸۳۵ and Triphleba Rondani, ۱۸۵۶ are reported for the first time from the country. Diagnostic characters of the studied species along with their photographs are provided

کلمات کلیدی:

Phoridae, Conicera, Dohrniphora, Gymnophora, Triphleba, Iran, New records
