خلاصه مقاله:

Fifteen species belonging to ten genera of the encyrtid wasps (Hymenoptera: Chalcidoidea, Encyrtidae) were collected in southern Iran and are presented here with the host records. Four species are newly recorded for the Iranian fauna: *Blastothrix aprica* Sugonjaev, ۱۹۶۴; *Psyllaephagus belanensis* (Hoffer, ۱۹۶۳); *Psyllaephagus pulchellus* (Mercet, ۱۹۲۱) and *Anagyrus archangelskayae* Trjapitzin, ۱۹۷۲. Some new host associations were found for ۱۰ encyrtid species. Two misidentifications were corrected. Available biological data as well as geographical distribution for each species are also included.

کلمات کلیدی:

parasitoids, fauna, new host associations, new records, Iran
