## خلاصه مقاله:

The genus *Euxoa* Hübner, [۱۸۲۱] is regarded as the most highly evolved among the genera of the subfamily Noctuinae and contains by far the largest number of species of the subfamily in Europe and in the Palearctic region. Fifty-four species of this genus has been already reported from Iran. In this paper a list of ۱۷ already recorded species and subspecies of *Euxoa* from the north-east of Iran is given and discussed. Furthermore, *E. acuminifera* (Eversmann, ۱۸۵۴) is newly reported for the fauna of Iran. Figures of its adult male and female and their genitalia are provided together with bionomics and distribution of the species

## کلمات کلیدی:

Noctuidae, *Euxoa*, fauna, distribution, new record, Khorasan
