## خلاصه مقاله:

Grass flies of the subfamily Chloropinae were studied in the Shabestar region, East Azerbaijan province- Iran, during ۲۰۱۳-۲۰۱۴. As a result, ۲۶ species belonging to ۱۲ genera were identified of which one genus and three species are new records for the insect fauna of Iran: *Phyladelphus* Becker, ۱۹۱۰; *Lagaroceras curtum* Sabrosky, ۱۹۶۱; *Neohaplegis glabra* (Duda, ۱۹۳۳) and *Phyladelphus thalhammeri*, Becker ۱۹۱۰.

## کلمات کلیدی:

Chloropidae, Chloropinae, new records, Shabestar, Iran
