تعداد صفحات اصل مقاله: 23

**نویسنده:**

Mariam S. Mir - *Institute for Cultural Studies*

**خلاصه مقاله:**

In Sufism, one may find a very interesting feminine approach according to which the feminine is the source of life. Though it is roughly distinguished from modern feminism in principle and aim, it would be very critical to see how this perspective overcomes the masculine dominated world. The overall aim of this paper is to give only a remark and an entry to this perspective without involving in its implications.
