## خلاصه مقاله:

**Background & Objective:** Interns are one of the most important groups among medical student and thus must learn to use evidencebased medicine (EBM) The present study was performed with the aim of evaluating the knowledge of medical interns of Mashhad University of Medical Sciences (MUMS) Iran on evidencebased medicine in ۲۰۱۳

**Methods:** In this descriptive crosssectional study ۷۰ medical interns were selected using convenience sampling method Data were gathered using a standard questionnaire and analyzed by descriptive statistics and SPSS software

**Results:** The information source for clinical decision making in ۶۵۷% of interns were their textbooks among which ۶۲۹% used textbooks because of their accessibility In addition ۹۵۷% of interns believed EBM to be useful in improving patient care However only ۳۷۱% of them knew the meaning of EBM and ۹۵۷% were not familiar with EBM internet sites **Conclusion:** Integrated planning is necessary in order to include EBM courses in medical curriculum and to teach the use of internet and correct forms of searching

## کلمات کلیدی:

Knowledge, Medical interns, Evidence, based Medicine
