خلاصه مقاله:

This article is a taxonomic review after Flora Iranica concerning some species of Bromus sect. Bromus. Comparing the holotype, isotype and paratype of *B. pseudobrachystachys* with the lectotype of *B. brachystachys* and also reexamination of three Iranian and Iraqi herbarium sheets putatively determined under the latter's name showed all belong to the former. *B. racemosus*, *B. arvensis* and *B. secalinus* are confirmed to occur in Iran. Despite *B. tigridis* was identified from Turkey based on the sheet Sorger & Buchner ۸۲-۶۲-۵۴, the Iranian specimen was identified as *B. racemosus*. Furthermore, a new record of this section i.e., *B. macrocladus* is reported here from mountains of Razi (village (W Khoy, NW Iran

کلمات کلیدی:

Taxonomic revision, new report, Bromus, Poaceae, Iran
