خلاصه مقاله:

In a revision of the genus *Anabaena* Bory ex Bornet et Flahault (Nostocaceae) in terrestrial habitats, 33 specimens belonging to eleven species and one variety were identified. Specimens were collected from 18 paddy field soils located in seven provinces of Iran. *Anabaena sphaerica* Bornet et Flahault, *A. portoricensis* N. L. Gardner, *A. fertilissima* C. B. Rao, *A. orientalis* Dixit and *A. ambigua* C. B. Rao are reported as five new records from Iran. An identification key, description and pictures of these species are presented in this study.

کلمات کلیدی:

*Anabaena*, Nostocaceae, morphospecies, new record, Paddy Field, Iran
