خلاصه مقاله:

Xi Jinping's new era of socialist economic thought, rooted in the great practice of China's economic construction, systematically explains the issue of China's economic development and reform, and clearly answers the important questions of how the economic situation is to be judged, how to judge the development stage, how to determine the development goals, and how to do economic work. Xi Jinping's new era of the socialist economy with Chinese characteristics, system integrity, broad depth, logic and strict, each aspect of the discourse has a creative and vital point of view, forward-looking strategic deployment and "four beams and eight pillars" of the key initiatives. Combining the in-depth study of Xi Jinping's new era socialist ideology with Chinese characteristics and the spirit of the Party's 19th National Congress, this paper tries to sort out Xi Jinping's new era socialist economic thought with Chinese characteristics from five aspects, such as direction theory, goal theory, epistemology, strategy theory, and bottom-line theory.

کلمات کلیدی:

Leadership, Xi Jinping, Sustainable Economic Growth, China
