**خلاصه مقاله:**

Frame theory is a lattice theory applied to topology. T-fuzzy frame is a system of frame homomorphisms which is related to a frame in awayparallel to that in which fuzzy spaces is related to a space. In this paper wepresent a definition of fuzzy uniform frames and define the functors between the categories offuzzy uniform frames and fuzzy uniform spaces.

**کلمات کلیدی:**

T-valued space, covering T-valued uniform space, fuzzy frame, covering fuzzy uniform frame
