خلاصه مقاله:

In this study a specific solar energy utilisation is explained. In the earthquake regions of the earth, earthquakes may cause significant damages and curing the damages may take long time. On the other hand, the most help needed period in an earthquake is the immediate afterwards of the earthquake. People survived find themselves in a chaos and helpless atmosphere and this situation cause serious depressions and phycologic health problems afterwards. Taking these issues into consideration, Clean Energy Foundation (CEF) prepared a project on the usage of solar energy to overcome some serious problems occurring in an earthquake and relax people
