عنوان مقاله:
Segmentation of lines in Handwritten Texts based on Fuzzy Intervals

نویسنده:
Hossein Kardan Moghaddam

خلاصه مقاله:
Segmentation of lines between handwritten texts as one step in detecting texts has slant. In this paper a new method based on fuzzy logic is proposed in order to approximate andconnect inter textual lines. This proposed method has been tested on data banks in Persian and English languages

کلمات کلیدی:
textual lines segmentation, horizontal extension, coloring algorithms
