

### عنوان مقاله:

An efficient approach to the study of wave climate in coastal waters – the modelling aspect

### محل انتشار:

چهارمین کنفرانس بین المللی سواحل و بنادر و سازه های دریایی (سال: 1379)

تعداد صفحات اصل مقاله: 10

### نویسندگان:

Mauro SCLAVO - Doctor of Physics ISDGM S.Polo ۱۳۶۴ ۳۰۱۲۵ Venice, Italy

Gerassimos A. ATHANASSOULIS - Doctor in Marine Hydrodynamics N.T.U.A. Zographos Athens, Greece

Steve BARSTOW - Doctor of Offshore Engineering Oceanor Pir Senteret Trondheim, Norway

Luigi CAVALERI - Mechanical Engineer ISDGM S.Polo ۱۳۶۴ ۳۰۱۲۵ Venice, Italy

### خلاصه مقاله:

The available data, modelling and software capabilities existing on the market has been assembled into a single product to offer to the user the possibility of a rapid exploration of the wave conditions all along the European coast. The wave modelling aspect of this project is described-in-details.

### کلمات کلیدی:

coastal zone, marine parameters, wave statistics, wave modelling, shallow water
