## خلاصه مقاله:

Economic criteria are the one of the main issue in Grid resource discovery. Resource allocation based on bargaining is one of the useful and famous methods in Grid economy model. A bilateral negotiation model with the aims of improving the agreement speedup between the users and the resource provider is presented in this paper. The communication criteria for speeding up the agreement, is also taken into account in this approach. Also, the load balancing will be guaranteed by resource workload regulation in the proposed model.

## کلمات کلیدی:

Grid, Bargaining, Resource Management, Negotiation Strategy
