خلاصه مقاله:

One of the main categories of linguistics that is vitally important is sociolinguistics, and pidgin and creole and their origins studies are one of the main issues discussed in the field of sociolinguistics. The purpose of this research is to investigate the origins of pidgin and creole, and if there is a relationship between them, if yes, how creole language was originated by pidgin during period of time, and the effect of them on language teaching. It also deals with such a study in the context of Iran. The trend of development of pidgin to creole over time, and the changes that took place in this area and the phenomena in Iran will be discussed. The findings of this research can be in the way for determining the creole languages that are used today by many peoples, and to find out how they have been created over time and became a native language which is acceptable by other speakers in Iran

کلمات کلیدی:

sociolinguistics, language teaching, pidgin, creole
