خلاصه مقاله:

The relationship between borderline personality disorder and bipolar spectrum disorders, particularly bipolar has been subjects of interest to many researchers in recent years. People who have the ability to detect, control and use their emotional capabilities of social support, sense of satisfaction, physical and mental health will be better. Since the understanding of the processes underlying the understanding and treatment of this disorder can help them, so this research is to examine the relationship between the structure of personality disorder. Emotional intelligence can identify, understand, control and supervision over the excitement of the people. Because it tends to increase the power of communication, increased compatibility with others, problems and conflicts between the individual and overall quality of life of these people will be.

کلمات کلیدی:

Borderline, personality, disorder, emotional
