خلاصه مقاله:

Aims: This research try to assess Mental Health and Its Relationship with Job Satisfaction on Staff at Imam Khomeini Committee. **Methods:** the study carried out on 252 personnel of a Imam Khomeini Committee. Data was collected using mental health Checklist-25 and job Satisfaction Questionnaire JDI. **Results:** There is not meaningful relationship between job satisfaction (wage, salary, promotion,...) and mental health. This is why these staff just want to have job .with determined salary and wage without any promotion in their jobs

کلمات کلیدی:

Mental Health, job Satisfaction, wage, salary, promotion
