خلاصه مقاله:

The 1393 ministers group Act removed the oxygenate requirement but mandated the increased use of renewable fuel, such as ethanol. On the other hand the important strategy in N.I.O.R.D.C is product Euro4 (U4) gasoline. Standard ISO 17025 can we use in Reference Refinery Laboratory. One of the important items in this standard is estimation uncertainty. In this report we calculate uncertainty for all property of Abadan Refinery Gasoline

کلمات کلیدی:

ISO 17025, Uncertainty, Euro4, Gasoline
