

عنوان مقاله:

Synthesis of dialkyl 2-(N-benzoyl-N'-(2-oxoindolin-3-ylidene)hydrazinyl-3-alkyliminomethylene) succinate from alkyl isocyanide with dialkyl acetylenedicarboxylates and hydrazones

خلاصه مقاله:

The one-pot three-component reaction of alkyl isocyanides and dialkyl acetylenedicarboxylates with hydrazones proceeded at dichloromethane at room temperature and completed after 2 days to afford title compounds as highly functionalized ketenimines

کلمات کلیدی:

Alkyl isocyanides; Benzhydrazide; Isatin; Ketenimines; Three-component reaction Running title: Synthesis of Ketenimines
