خلاصه مقاله:

This study was to evaluate the realization of welfare-oriented policies of social policies in the Fourth Five-Year Development Plan by analysing the structure and content of the program and program administrators in evaluating the objectives of the program. Iran is in the proper position in the region and the world Iran. The welfare-oriented policies in order to achieve Article (13), were also on the agenda of social policies, so the analysis of social policies and programs to determine their content in four factors of Policy (Social Services, poverty, public institutions, NGO charities), both in terms of process evaluation and outcome evaluation using scientific methodology and techniques based on expert consensus (the Delphi method, and a group of experts), the rate applicable to the performance from two aspects (quantitative and qualitative) were studied with social policies. Results indicate that the total assessment process and output partial fulfilment of social policies has Welfare-oriented Development Plan, the issue of damages related to the formulation, implementation, monitoring and damage the inherent policy and planning, in particular, the program will
