خلاصه مقاله:

Economic strength, economic indicators and direct basis is therefore immune to the difficult conditions and at the same time facilitating Affairs, is very important. Particular emphasis is centered around three economic strength, endogenous, focused on competitiveness and introspection of the subject is raised and must be active in global competition because more competitiveness, more success will follow. The important point is that economic strength in Sistan and Baluchistan is a road map and its obligation to properly identify and, if implemented, could be the future direction of long-term government of the province's economy and achieve economic goals and provide other specified. The creation of large industrial investments in companies with public and private sector, including petrochemical, steel, rubber and cement, and track and provide several large industrial projects such as wire rubber crown in Zahedan, according to relevant export markets Concrete Sbg gas, processing date, according to mine silica glass fiber in Iranshahr in this city, dietary supplements beta Transportation in Chabahar, extraction of magnesium from the water or in the Chabahar is in line with the economic policy of resistance. Native of the economy and development from the bottom up self-confidence and influence would impact on the country's macro programs

کلمات کلیدی:

economic strength, Sistan and Baluchistan, industrial
