## خلاصه مقاله:

.steel belts, braces, seismic retrofitting, screen, building materials, finite element

## کلمات کلیدی:

Building structures because Affordable cost, easy fabrication, high-speed, resistance to fire,corrosion and decay, the availability of materials and local craftsmen welcomed and used in mostparts of the country. Diversity in terms of improving this type of construction is progressing dayby day. Using outer arm, Sprayed concrete, FRP strips such as these. The research is relativelynew; the failure of unreinforced reference Inside Page a wall with the actual ratio (0.22 x 3 x 3m) with its improvement has been investigated. Improvement by reference as cross-vertical wallconnecting steel bands (on
