

عنوان مقاله:

Chemical reaction of Maleic anhydride (MAN) polymers with Benzophenone oxime groups

محل انتشار:

دهمین سمینار بین المللی علوم و تکنولوژی پلیمر (سال: 1391)

تعداد صفحات اصل مقاله: 1

خلاصه مقاله:

Maleic anhydride (MAN) is an excellent monomer which can provide reactive anhydride or carboxylic groups, with nucleophilic molecules. Recently , extensive studies have been performed on the radical copolymerization of MAN with other monomer and the self assembly of their copolymers [1].results show that maleic anhydride (MAN) have a low [tendency to homopolymerize. But copolymers by other monomers , can be obtained via radical polymerization.[2
