خلاصه مقاله:

One of the most important results of globalization is increased competition in economics at the international level. In these circumstances, all countries try to maximize productivity in various fields, including economics. This study sought to assess the status of e-commerce as one of the new scopes of economic development and growth. Certainly, the most important consequences of globalization on the national economies is growth of e-commerce with elements of the electronic market, electronic data interchange, and internet commerce that reflects the close relationship between ICT and current processes and trends and advances of market and business. In current conditions, e-commerce share of total world trade flows is growing by the day. The importance of this study lies in the increasing role of electronic commerce in international economics. In this study, library method based on taking notes from written sources and the Internet is used. Also descriptive-analytical method is used in this paper

کلمات کلیدی:

globalization, International Economy, e-commerce
