خلاصه مقاله:

Android is based on Linux kernel. Android based device is being activated per day and power source of this device is becoming an issue. Energy-aware solutions help to reduce energy usage, improve energy efficiency, and increase usage of renewable energy. This paper is for anyone who may have recently heard the term Energy-aware for the first time and needs to know what it is and how it helps them,so we review some related papers on the topic

کلمات کلیدی:

android os,energy-aware,linux,power source
