## خلاصه مقاله:

Increasing numbers of population-based surveys across the world include questions that allow for an estimate of the size of the lesbian, gay, bisexual, and transgender (LGBT) population and asexual people. This research brief discusses challenges associated with collecting better information and terms about the LGBT and asexual community. This article suggested some terms for the study of population and changes of LGBTs and asexual people. Evaluation of the size of the LGBT and asexual community in every society are so necessary and for accepting them and their rights in society, we need exact studies on their population in the world.

## کلمات کلیدی:

LGBT, Asexual, homofylography, bifylography, transfylography, afylography
