خلاصه مقاله:

Related regulation to currency contraband verified in different process. This distribution leads to their confusion and command contradiction. So informing these rules is necessity by criminology and customs since 2 article is base on condemn crimes they are not consistent to constitution, since good obtain is financial penalty. Since government can set government income and custom law we can return government income to office since this kind of goods should take in everywhere level of penalties should be relative to 2 sections. Rule-maker should defend well. Ministries board provided one general definition of their concept, provide legal approach for distinct buy and sell contraband good and lawful caring of gun, not breach individual law and free. Another issues are decrease prices and restrictions problems of enter good and export free low businessman profit, evaluation political and geographical problems relate to good contraband and border live employment, continues control on their performance, increase good quality to new industries and supervision on their performance. Also make approached for some goods and decrease good production
