خلاصه مقاله:

Complete blood count (CBC) is a whole unit and important test. It is important since it can help. The aim of this study was to evaluate the Bandar Abbas dentist's knowledge about CBC test. In this cross-sectional descriptive study, a questionnaire was directly referred to 120 dentist's office. Data analyzed using SPSS software by chisquare test. The mean score of the dentists was 69%, which is just optimal. Training courses and better education at the schools of dental sciences, can help dentist's better performance

کلمات کلیدی:

Awareness, Attitude, Complete Blood Count (CBC), Dentist
