عنوان مقاله:

Some xed point theorems for C-class functions in b-metric spaces

نویسندگان:

خلاصه مقاله:

In this paper, via C-class functions, as a new class of functions, a xed theorem in complete b-metric spaces is presented. Moreover, we study some results, which are direct consequences of the main results. In addition, as an application, the existence of a solution of an integral equation is given.

کلمات کلیدی:

Fixed point, Complete metric space, b-metric space, C-class function
