خلاصه مقاله:

Caves are nowadays considered to be one of the most beautiful and wonderful manifestations of nature in the world. Their existence in each area, in addition to being part of the ecosystem of the area, is also economically important in attracting tourists and developing the area. The Concrete Cave (dragon), the city of Sarayan, southern Khorasan Province, can be one of the most attractive phenomena of geotourism in attracting tourists to the area.

کلمات کلیدی:

Baton Cave, Sarayan, Desert
