

عنوان مقاله:

Hydraulic Fracturing Design Concepts In 2-Dimentional Models

محل انتشار:

پنجمین کنفرانس بین المللی مهندسی شیمی و نفت (سال: 1398)

تعداد صفحات اصل مقاله: 12

نویسنده:

Ali Chehardah Cherek

خلاصه مقاله:

Hydraulic fracturing is a technique used by the oil and gas industry to increase a well's productivity. For designing hydraulic fracturing, it must be considered important parameter to increase fracturing operation performance. In this research focused on 2-dimentional hydraulic fracturing design and important parameters were effect on fracturing design and operation

کلمات کلیدی:

Hydraulic fracturing; oil and gas; 2-Dimentional
