## خلاصه مقاله:

This case study is carried out to translate the mission driven intentions of individual social entrepreneur Mr. Siddiqui. The study highlights the role of social enterprise Sukkur IBA University in the sustainable socio-economic development through social innovation. Sukkur IBA University is one of the biggest social enterprise with more than fifteen community colleges and schools that are imparting both professional and technical skills to the students. In addition, Sukkur IBA with the collaboration of OGDCL and many other sponsors is offering scholarships to more than 70% of the students. Consequently, this will a great support for the poor and needy people of the society to get quality education. This is an effort of significant importance in value creation and sustainable socio-economic development.
