

عنوان مقاله:

thermodynamic analysis of xylene/natural gas combustion

محل انتشار:

سومین کنفرانس احتراق ایران (سال: 1388)

تعداد صفحات اصل مقاله: 10

نویسندگان:

خلاصه مقاله:

Alkylbenzenes are one of the important groups of air pollutants and their treatment need to be analyzed and addressed. Xylene is one of these alkylbenzenes and its oxidation has been studied via thermodynamic analysis using CHEMKIN software.

کلمات کلیدی:

xylene, oxidation, thermodynamic equilibrium, air pollution, CHEMKIN
