## خلاصه مقاله:

Nowadays, the urbanization trend has led to an unprecedented concentration of cities, access to smaller spaces and less ownership. In the context of this urbanization and urban sprawl, the environment has faced many problems, including pollution and urban waste. Empowering cities to green spaces can aid in order to minimize weather and urban issues, to some extent. The ever-increasing growth of technology has resulted in steps to surmount some of the challenges. The advent of sharing economy, an economy that emphasizes the platform and utilizes untapped potential has many advantages that can be addressed as an approach to reduce the economic repercussions. Moreover, urban farming for urbanized society plays a critical role so that people's basic needs can be met and by applying this, the devastating environmental impact could be declined. In this paper, the emergence of sharing economy with the aim of .urban farming development has targeted, as well as introducing some measures regarding sharing economy platform

## کلمات کلیدی:
